

Dear hiring manager,

My professional experience has ranged from senior e-commerce developer at McAfee.com to director of web development at MedAmerica. I was recently working as a Programmer / Analyst III in the School of Medicine at UCSF (grant funded through April, 2009). The positions I have held have been fast-paced, challenging and broad in scope and have required strong technical and project planning ability.

I have been instrumental in the development and implementation of web development projects. Indeed, I have a proven track record of helping organizations utilize a variety of technologies to achieve their IT and business goals.

Results achieved to date include:

- Developed neonatal web portal and TPN Order Calculator which is currently in a clinical trial at UCSF in the Neurodevelopmental Intensive Care Nursery.
- Participated in the development and launch of the McAfee.com website.
- Managed and developed 5 medical websites.

I look forward to working with you to find an appropriate position. I am a seasoned, competent professional with good references. I can be contacted at 415.850.9518 or gregor_fisher@yahoo.com. You can also visit my website at <http://www.gregorfisher.net> for more information about my skills and experience.

Thank you,
Gregor Fisher
