Objective

Information technology manager, network architect, and application developer with expertise on both Microsoft and Unix based platforms. I have demonstrated talent for re-engineering websites using a variety of project management practices (currently studying for PMP certification). I am a consummate professional with solid knowledge of object oriented application development, networking, as well as distributed computing environments (web services). I am looking to continue applying these skills in a medical environment.

Work Experience

Programmer/Analyst III (grant position funded through 4/2009)

4/2007 - Present UCSF Pediatrics, San Francisco, CA

- Coordinate and develop web based medical applications and websites.
- Developed a web based Total Parenteral Nutrition Calculator that is currently in a clinical trial in the Intensive Care Nursery.
